

Windows Laptop Chrome

1. Turn on your device:
 - › If WiFi is enabled the available wireless networks will be detected automatically
 - › Select the WiFi icon on the lower right taskbar
 - › Select **TAFEGUEST**
 - › Try turning WiFi off and on again if networks are not found

2. Proxy Configuration:

- › Open Chrome and select **Settings**
- › Show **Advanced Settings**
- › **Network – Change Proxy Settings**
- › **Connections Tab**
- › **LAN Settings**
- › Check Automatically detect settings

3. If prompted or when you open your web browser **enter your TAFE username – firstname.lastname and password.**

Windows Laptop FireFox

1. Turn on your device:
 - › If WiFi is enabled the available wireless networks will be detected automatically
 - › Select the WiFi icon on the lower right taskbar
 - › Select **TAFEGUEST**
 - › Try turning WiFi off and on again if networks are not found

2. Proxy Configuration:

- › Open Firefox
- › Select **Firefox Tab or Tool icon**
- › **Options**
- › **Advanced**
- › **Network**
- › **Connection – Settings**
- › Check the Auto detect settings for this network

3. If prompted or when you open your web browser **enter your TAFE username – firstname.lastname and password.**

Windows Laptop Internet Explorer

1. Turn on your device:
 - › If WiFi is enabled the available wireless networks will be detected automatically
 - › Select the WiFi icon on the lower right taskbar
 - › Select **TAFEGUEST**
 - › Try turning WiFi off and on again if networks are not found

2. Proxy Configuration:

- › Open Internet Explorer
- › **Tools**
- › **Internet Options**
- › **Connections Tab**
- › **LAN Settings**
- › Check Automatically Detect Settings

3. If prompted or when you open your web browser **enter your TAFE username – firstname.lastname and password.**

Mac OSX/Safari

1. Turn on your device:
 - › If WiFi is enabled the available wireless networks will be detected automatically
 - › Select **TAFEGUEST**
 - › Try turning WiFi off and on again if networks are not found

2. Proxy Configuration:

- › **Apple Symbol**
- › **System Preferences**
- › **Network**
- › **Advanced**
- › **Proxies**
- › Check **Auto Proxy Discovery**
- › Check **Use Passive FTP Mode (PASV)**
- › **If you use Firefox or Chrome** also follow the Proxy Configuration instructions for Windows Laptops.

3. If prompted or when you open your web browser **enter your TAFE username – firstname.lastname and password.**

If wifi settings do not work: make sure your Apple software is up to date. You may need to use a personal network to install updates

Security settings: you may need to select the padlock in System Preferences and enter your Mac password to change Network settings.

Android

1. Turn on your device and enable WiFi:
 - > Select **Settings**
 - > Select **Wireless & Networks**
 - > Tap the check box to turn on WiFi
 - > Select **TAFEGUEST**
 - > Try turning WiFi off and on again if networks are not found

2. Proxy Configuration:

- > In **Settings, Wireless & Networks, WiFi** press and hold down **TAFEGUEST** for a few seconds to show options
- > Select **Modify Network Configuration**
- > Check the box: **Show Advanced Options**
- > Select **Manual**
- > Proxy = **proxy.det.nsw.edu.au**
- > Leave **Bypass Proxy URL** blank
- > Port = **8080** (type over grey text)
- > **Save**

3. If prompted or when you open your web browser **enter your TAFE username – firstname.lastname and password.**

If wifi settings do not work: make sure your Android software is up to date. You may need to use a personal network to install updates.

iPad/iPhone

1. Turn on your device and enable WiFi:
 - > Select **Settings**
 - > Select **Wi-Fi**
 - > Slide **Wi-Fi ON**
 - > Select **TAFEGUEST**
 - > Try turning WiFi off and on again if networks are not found

2. Proxy Configuration:

- > In **Settings and Wi-Fi** select **TAFEGUEST**
- > Slide down to the bottom of the screen and enter the following settings:
- > HTTP Proxy: **Manual.**
- > Enter the following:
 - > Server = **proxy.det.nsw.edu.au**
 - > Port = **8080**
 - > Authentication = **ON**
- > Enter your **TAFE username – firstname.lastname and password.**

3. If prompted or when you open your web browser **enter your TAFE username – firstname.lastname and password.**

If wifi settings do not work: make sure your iOS software is up to date. You may need to use a personal network to install updates.

Windows Tablet/Surface

1. Turn on your device and enable WiFi:
 - > **Swipe in from the right edge of the screen** and then select **Settings** (if you are using a mouse, point to the lower right corner of screen then click on settings).
 - > Select the **Network Icon** 
 - > Select **TAFEGUEST** and **Connect**
 - > Enter your **TAFE username – firstname.lastname and password.**
 - > Try turning WiFi off and on again if networks are not found

2. Proxy Configuration:

- > Open Internet Explorer
- > **Tools**
- > **Internet Options**
- > **Connections Tab**
- > **LAN Settings**
- > Check **Automatically Detect Settings**

3. If prompted or when you open your web browser **enter your TAFE username – firstname.lastname and password.**

Windows Phone

1. Turn on your device and enable WiFi:
 - > **Flick the home screen left** to access the **Charms Bar**
 - > **Settings**
 - > **Wi-Fi**
 - > Check that **Wi-Fi Networking** is set to **ON.**
 - > Select **TAFEGUEST**
 - > Try turning WiFi off and on again if networks are not found
 - > **Open Internet Explorer.** If you are prompted to enter **your TAFE username – firstname.lastname and password** you will not need to adjust proxy settings.

2. Proxy Configuration:

- > **Settings**
- > **Wi-Fi**
- > Make sure **Automatically Detect** is on.

3. If prompted or when you open your web browser **enter your TAFE username – firstname.lastname and password.**
