

Windows 11 - connect to TAFE NSW Wi-Fi

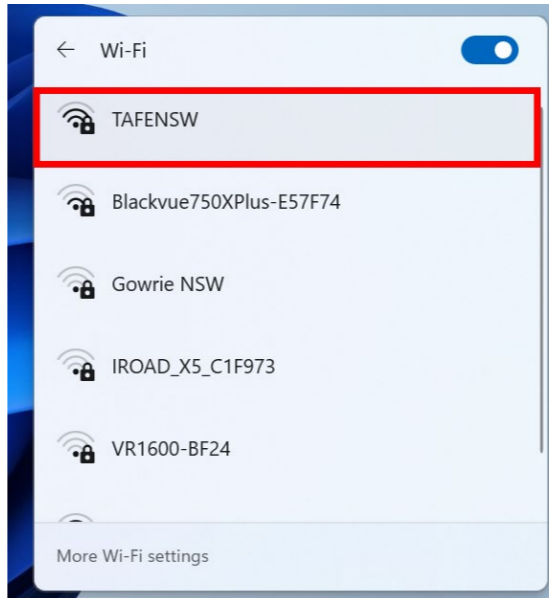

- 1** Click on the **Network Connection** icon in the bottom right-hand corner.

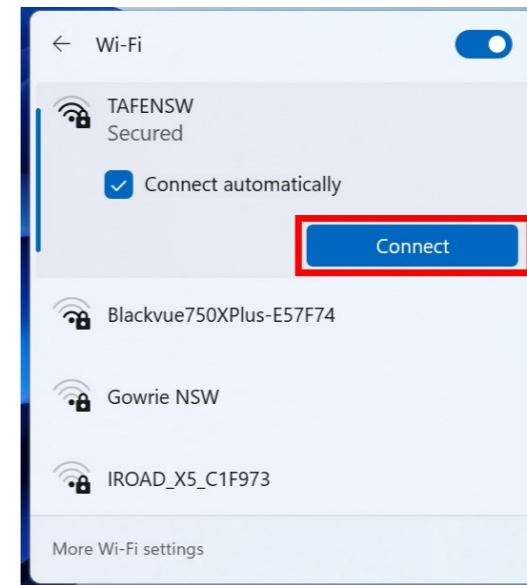

- 2** Click the arrow to **Manage Wi-Fi connections.**

- 3** Select **TAFENSW.**

- 4** Click **Connect.**

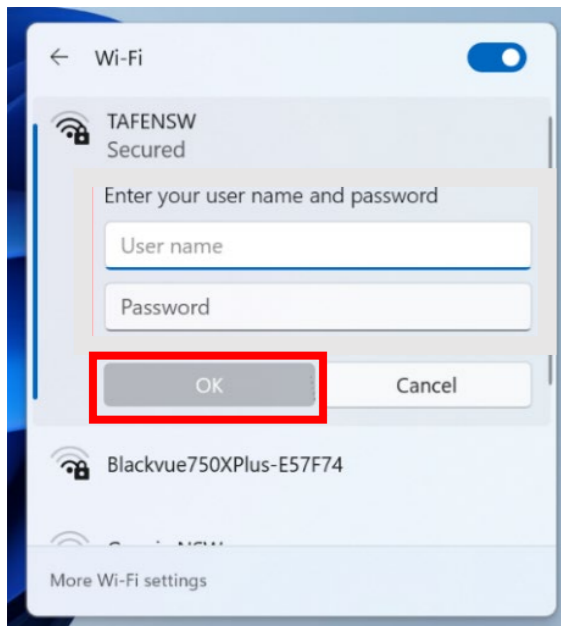

- 5** Type your **TAFE NSW email and password.**

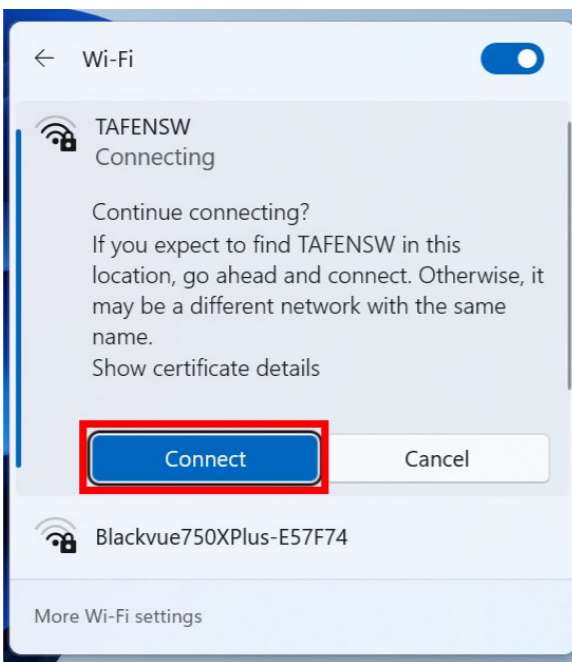

e.g.
firstname.lastname3@studytafensw.edu.au
 (student)
firstname.lastname@tafensw.edu.au
 (staff)

- 6** Click **OK.**

- 7** Click **Connect.**

- 8** If prompted, click **Continue connecting.**

You should now be connected to the TAFENSW Wi-Fi network.

- 9** To test this has worked, open your

- search engine
(Google | Bing)

or

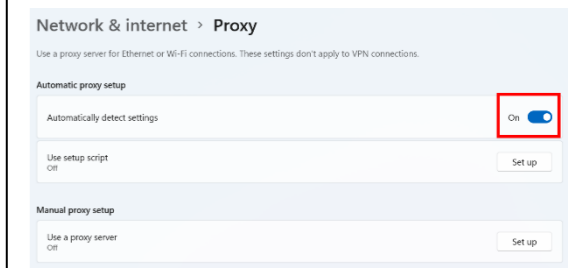

- web browser
(Chrome | Firefox | Edge)

and type a search word.

Your search results should appear soon.

- 10** Still not working?

Check that your **Automatic proxy setup** looks like this:

- Right-click the **Network** icon on the task bar, and select **Network & Internet settings**
- click **Proxy**

Windows 11 - more help

If you have followed our instructions but still cannot connect to the Wi-Fi, try one or more of these:

Forget the Network

Needed when you want to start again from scratch, or when you have changed your password.

- Right-click the **Network** icon on the task bar, and select **Network & Internet settings**
- click **Wi-Fi**
- click **Manage known networks**
- find the **TAFENSW** network in your list of networks and click **Forget**.

Now try to rejoin the network from scratch.

Handy Hint

Are you using the correct format for your **TAFE NSW email**? Also, if you were given a number after your last name, remember to add it in. For example:

firstname.lastname2@studytafensw.edu.au (students)

firstname.lastname@tafensw.edu.au (staff)

If using Firefox as your browser

On your Windows device, if using Firefox, you will need to configure the proxy in the browser.

Search for your version of Firefox on the Internet, to find specific instructions to configure your browser settings.

Or these instructions may work for some versions of Firefox:

- Select **Firefox tab** or **Tool icon**
- **Options**
- **Advanced**
- **Connection - Settings**
- tick ☒ the **Automatically detect settings** for this network.
